CALL FOR PAPERS

2nd ACM Workshop on Privacy in the Electronic Society

Washington, DC, USA – October 30, 2003

Sponsored by ACM SIGSAC – in association with 10th ACM CCS Conference

Privacy issues have been the subject of public debates and the need for privacy-aware policies, regulations, and techniques has been widely recognized. Goal of this workshop is to discuss the problems of privacy in the global interconnected societies and possible solutions to it. The 2003 Workshop is the second in what we hope will be a yearly forum for papers on all the different aspects of privacy in today's electronic society. The first workshop in the series was held in Washington, on 21 November 2002, in conjunction with the 9th ACM CCS conference. The success of this first workshop and the increased interest of the community in privacy issues, is the main reason for repeating the event. The workshop seeks submissions from academia and industry presenting novel research on all theoretical and practical aspects of electronic privacy, as well as experimental studies of fielded systems. We encourage submissions from other communities such as law and business that present these communities' perspectives on technological issues. Topics of interest include, but are not limited to:

anonymity, pseudonymity, and unlinkability	privacy-aware access control	privacy threats
data correlation and leakage attacks	privacy in the digital business	privacy and virtual identity
electronic communication privacy	privacy enhancing technologies	privacy policy enforcement
information dissemination control	privacy policies and human rights	privacy and data mining
privacy in health care and public administration	privacy and anonymity on the Web	privacy vs. security
privacy and confidentiality management	privacy in the electronic records	user profiling
personally identifiable information	public records and personal privacy	wireless privacy

Paper submissions Submitted papers must not substantially overlap papers that have been published or that are simultaneously submitted to a journal or a conference with proceedings. Papers should be at most 15 pages excluding the bibliography and well-marked appendices (using 11-point font and reasonable margins on letter-size paper), and at most 20 pages total. Committee members are not required to read the appendices, and so the paper should be intelligible without them. Papers should have a cover page with the title, authors, abstract and contact information.

To submit a paper, send to wpes@dti.unimi.it a plain ASCII text email containing the title and abstract of your paper, the authors' names, email and postal addresses, phone and fax numbers, and identification of the contact author. To the same message, attach your submission (as a MIME attachment) in PDF or portable postscript format. Do NOT send files formatted for word processing packages (e.g., Microsoft Word or WordPerfect files).

Papers must be received by the deadline of **June 10, 2003**. Accepted papers will be presented at the workshop and published by the ACM in a conference proceedings.

Panel proposals Proposals should be no longer than 5 pages in length, should include possible panelists and an indication of which panelists have confirmed participation. Send to wpes@dti.unimi.it a plain ASCII text email containing the title of your panel and contact information. To the same message, attach your proposal (as a MIME attachment) in ASCII, PDF, or portable postscript format. Do NOT send files formatted for word processing packages (e.g., Microsoft Word or WordPerfect files). Panel proposals must be received by the deadline of **June 10, 2003**.

Program Chairs
Pierangela Samarati
Università di Milano, Italy

General Chair
Sushil Jajodia
George Mason University, USA

Publication Chair
Sabrina De Capitani di Vimercati
Università di Milano, Italy

Panel Chair
Michael Waidner
IBM Zurich, Switzerland

Important dates

Paper submission due:	**June 10, 2003**
Panel submission due:	**June 10, 2003**
Acceptance notification:	**August 1, 2003**
Final papers due:	**September 1, 2003**

Program Committee

Diana Alonso Blas, European Commission
Ernesto Damiani, University of Milan, Italy
George Danezis, University of Cambridge, UK
Sabrina De Capitani di Vimercati, University of Milan, Italy
Roger Dingledine, The Free Haven Project, USA
Philippe Golle, Stanford University, USA
Marit Hansen, ICPP, Germany
David Martin, University of Massachusetts, USA
Birgit Pfitzmann, IBM Zurich, Switzerland

Marc Rennhard, ETH Zurich, Switzerland
Avi Rubin, Johns Hopkins University, USA
Adam Shostack, Canada
Chenxi Wang, Carnegie Mellon University, USA
Michael Waidner, IBM Zurich, Switzerland
Marc Wilikens, Joint Research Center, Italy
Marianne Winslett, U. of Illinois Urbana-Champaign, USA
Rebecca Wright, Stevens Institute of Technology, USA
