

CALL FOR PAPERS

3rd ACM Workshop on Privacy in the Electronic Society

Washington, DC, USA – October 28, 2004

Sponsored by ACM SIGSAC – in association with 11th ACM CCS Conference

Privacy issues have been the subject of public debates and the need for privacy-aware policies, regulations, and techniques has been widely recognized. Goal of this workshop is to discuss the problems of privacy in the global interconnected societies and possible solutions to it. The 2004 Workshop is the third in what we hope will be a yearly forum for papers on all the different aspects of privacy in today's electronic society. The first two workshops in the series were held in Washington, in conjunction with the 9th ACM CCS conference and with the 10th ACM CCS conference, respectively. The success of the first two editions of the workshop and the increased interest of the community in privacy issues, is the main reason for repeating the event.

The workshop seeks submissions from academia and industry presenting novel research on all theoretical and practical aspects of electronic privacy, as well as experimental studies of fielded systems. We encourage submissions from other communities such as law and business that present these communities' perspectives on technological issues. Topics of interest include, but are not limited to:

anonymity, pseudonymity, and unlinkability
data correlation and leakage attacks
electronic communication privacy
information dissemination control
privacy in health care and public administration
privacy and confidentiality management
personally identifiable information

privacy-aware access control
privacy in the digital business
privacy enhancing technologies
privacy policies and human rights
privacy and anonymity on the Web
privacy in the electronic records
public records and personal privacy

privacy threats
privacy and virtual identity
privacy policy enforcement
privacy and data mining
privacy vs. security
user profiling
wireless privacy

Paper submissions Submitted papers must not substantially overlap papers that have been published or that are simultaneously submitted to a journal or a conference with proceedings. Papers should be at most 15 pages excluding the bibliography and well-marked appendices (using 11-point font and reasonable margins on letter-size paper), and at most 20 pages total. Committee members are not required to read the appendices, and so the paper should be intelligible without them. Papers should have a cover page with the title, authors, abstract and contact information.

Authors are invited to submit their contributions electronically through the web site <http://seclab.dti.unimi.it/wpes2004/submissions.html>. Submission must be in the form of a ps (Postscript), or pdf (Adobe) file. Do NOT submit files formatted for word processing packages (e.g., Microsoft Word or WordPerfect files).

Papers must be received by the deadline of **June 11, 2004** in order to be considered. Notification of acceptance or rejection will be sent to authors by **August 2, 2004**. Authors of accepted papers must guarantee that their paper will be presented at the workshop. Accepted papers will be published by the ACM in a conference proceedings.

General Chair

Vijay Atluri

Rutgers University, USA
